

INTELCAN PASSES FLIGHT CHECK IN ECUADOR

Intelcan's NAVAID team has passed the Flight Check for the ILS system at New Quito International Airport in Quito, Ecuador. The Flight Check was performed by the Director General of Civil Aviation (DGAC) of Ecuador.

Located at Runway 36, the ILS fulfils Cat III precision approach capabilities. Due to the airport's approach clearance, the ILS will only be used for CAT-I precision approach capability.

As part of the contract for the upgrade of CNS/ATM systems in Quito, Intelcan has deployed a DVOR/DME System in addition to the ILS. The New Quito International Airport is scheduled to start operations in the fall of 2012.

ABOUT INTELCAN

Intelcan Technosystems Inc. is a Canadian CNS/ATM and Airport Infrastructure solution provider. Integrating Intelcan's own products or utilizing those from a diverse supplier network, Intelcan has delivered complete and cost-effective solutions to fulfil client requirements in over 60 countries.

Intelcan delivers airport infrastructure solutions which range from the construction of air traffic control towers to complete airport implementation.

Headquartered in Ottawa Canada since its establishment in 1973, Intelcan has expanded into Cuba, Spain, France, Poland, Bulgaria, Cyprus, South Africa, Korea and a research and development facility in Montreal, Canada.

All Intelcan's solutions meet and exceed Eurocontrol and ICAO regulations and are developed under ISO 9001:2008 quality management procedures.
