**INTELSCAN AWARDED LIBERIAN CONTRACT**

Intelcan was awarded a contract in Liberia for the modernization of the CNS/ATM equipment in Roberts Field International Airport. The project includes the supply and installation of new equipment for the Air Traffic Control tower and Intelcan’s signature SKYNAV Product Suite including the SKYNAV Instrument Landing System (ILS) and the SKYNAV Distance Measuring Equipment (DME) as well as a DVOR. The award of this contract demonstrates the commitment of the Liberia Civil Aviation Authority (LCAA) to significantly improve air traffic safety in Liberia’s airspace by relying on Intelcan’s reputable expertise in the region.

Intelcan is providing the SKYNAV ILS N8000 which exceeds the highest standards for precise radio guidance in the aircraft’s final approach and landing. Whether for Category I, II or III, the N8000 guarantees signal integrity. The Liberian contract also contains both the Low Power (100W) and High Power (1000W) SKYNAV DME N9000, state-of-the-art systems with flexible configuration that offer: Single and Dual transponder and monitoring, Cold or Hot Standby configuration and Omni-Directional or Unidirectional Antenna systems.

“Intelcan continues to expand its presence throughout the African continent and is very pleased to be working with the LCAA on a project that is critical for the security of aviation in Liberia and will assist in LCAA’s goal to promote a safe civil aviation sector,” says Georges Ata, President and CEO of Intelcan.

With proven expertise as a trusted CNS/ATM provider, Intelcan continues to build strong relationships with its recent and long-standing African client base, including Liberia, ASECNA, Guinea, Sierra Leone, Ethiopia, and Tanzania.

**ABOUT INTELSCAN**

Intelcan is a Canadian CNS/ATM and Airport Infrastructure solution provider. Integrating Intelcan’s own SKY-Suite, fully compliant products or utilizing those from a diverse supplier network, Intelcan delivers cost-effective solutions, worldwide. Intelcan’s airport infrastructure solutions range from the construction of air traffic control towers to complete airport implementation. Headquartered in Ottawa, Canada since its establishment in 1973, Intelcan has expanded globally to efficiently reach its vast client base and secure full life-cycle support.
