INTELCAN-KUWAIT: MAJOR CONTRACT FOR NAVIGATIONAL AID EQUIPMENT

Intelcan signed a contract for the design, supply, installation, operation and maintenance of Navigational Aid Equipment for Kuwait International Airport.

This is one of Intelcan's largest Navigational Aids contracts. The SKYNAV CAT III Instrument Landing System (ILS) and SKYNAV Distance Measuring Equipment (DME) will be supplied to improve the capacity, safety and accuracy of landing onto the two runways at the Kuwait International Airport. This modernization project is in accordance with the standards and requirements of the International Civil Aviation Organization (ICAO).

The Directorate General of Civil Aviation of Kuwait said in a statement that its contract with Intelcan includes the design, supply, installation, operation and maintenance of system services and navigational aids for air traffic and supply of the latest aircraft landing systems.

The contract includes the supply of the latest DVOR/DME devices at Kuwait International Airport and Al Wafra, providing aircrafts with azimuth and distance to these locations. This will greatly improve the capacity, safety and accuracy of over flights in the airspace of Kuwait, according to the standards and requirements of the ICAO.

The project will provide an extensive training program, through courses in both Kuwait and Canada, for engineers of the Directorate General of Civil Aviation of Kuwait as well as 3 years maintenance Services in Kuwait.

This project is an important element in the modernization of Kuwait's airspace and allows the Kuwait International Airport to contend with the on-going growth in traffic. Intelcan will implement the project over the next two and a half years.

ABOUT INTELCAN

Intelcan is a Canadian CNS/ATM and Airport Infrastructure company that provides solutions allowing its customers to achieve the highest standard of safety and efficiency in aviation and airspace operations, at a competitive price. Integrating Intelcan's own SKY-Suite, fully compliant products or utilizing those from a diverse supplier network, Intelcan delivers cost-effective solutions, worldwide. Intelcan's airport infrastructure solutions range from the construction of air traffic control towers to complete airport implementation. Headquartered in Ottawa, Canada since its establishment in 1973, Intelcan has expanded globally to efficiently reach its vast client base and secure full life-cycle support.

SKY-SUITE FAMILY OF PRODUCTS

SKYCOM

- D-ATIS
- AFTN/AMHS
- Voice Recorder
- Data Recorder
- VCCS

SKYNAV

- ILS
- DME
- Marker Beacon

SKYSURV

- PSR S/L Band
- MSSR Mode S
- GS ADS-B
- GS MLAT
- V-Track

SKYCONTROL

- Procedural ATM
- Radar ATM
- Tower EFS
- ASDE

SKYSYNC

- Master clock

SKYREMOTE

- RCMS
- Safety Management
