INTELCAN COMMISSIONS NAVIGATIONAL AIDS AT LUBLIN INTERNATIONAL AIRPORT IN POLAND

Intelcan successfully delivered, installed and commissioned its SKYNAV Instrument Landing System (ILS) and Distance Measuring Equipment (DME) at the Lublin International Airport. The ILS and DME systems are now operational and functioning as expected.

This is the second Navigational Aid system that Intelcan commissioned in Poland. As in the case of the International Airport in Wroclaw, Intelcan provided two sessions of comprehensive training of PANSA's engineers and technicians, through courses held in both Poland and Canada.

The SKYNAV ILS N8000 exceeds the highest standards for precise radio guidance in the aircraft's final approach and landing. The SKYNAV DME N9000 contains flexible configurations that offer: Single and Dual transponder and monitoring, Cold or Hot Standby configuration and Omni-Directional or Unidirectional Antenna systems.

ABOUT INTELCAN

Intelcan is a Canadian CNS/ATM and Airport Infrastructure company that provides solutions allowing its customers to achieve the highest standard of safety and efficiency in aviation and airspace operations, at a competitive price. Integrating Intelcan's own SKY-Suite, fully compliant products or utilizing those from a diverse supplier network, Intelcan delivers cost-effective solutions, worldwide. Intelcan's airport infrastructure solutions range from the construction of air traffic control towers to complete airport implementation. Headquartered in Ottawa, Canada since its establishment in 1973, Intelcan has expanded globally to efficiently reach its vast client base and secure full life-cycle support.

SKY-SUITE FAMILY OF PRODUCTS
