

CANSO announces a new member

20 September 2006
Amsterdam, the Netherlands

CANSO, the global association of Air Navigation Service Providers (ANSPs), is delighted to announce that Intelcan of Ottawa, Canada, has joined the association as an associate member.

Intelcan Technosystems Inc. manufactures, supplies, and integrates communications, navigation, surveillance, and air traffic management (CNS/ATM) solutions on a complete turnkey basis and caters to a global-client base from offices in Canada, Europe and Latin America. Earlier this year the company completed the integration of an MSSR system into ATM network of Azerbaijan.

“We are delighted to welcome Intelcan into the CANSO community,” said CANSO secretary-general Alexander ter Kuile. “The ability to integrate complex new technologies into an effective ATM network is a key enabler to providing safe, efficient and environmentally sustainable air traffic services for the future.”
