

INTELCAN SIGNS CONTRACT FOR THE UPGRADING OF AIR NAVIGATION SYSTEMS IN SURINAME

OTTAWA, ONTARIO, CANADA – OCTOBER 16, 2008

Intelcan, a world-wide provider of Air Traffic Control (ATC) and airport development solutions signed a multi million dollar contract with the Civil Aviation Department of Suriname (CADSUR) to provide a turnkey CNS/ATM solution.

This project will consist of: a primary surveillance radar, secondary surveillance radar, VHF air to ground communication equipment, AMHS, AWOS, VCSS, Air Traffic Management (ATM) software and simulation consoles. Once installed at the J.A. Pengel International Airport and the Pengel International Airport, this system will provide a complete Air Traffic Management (ATM) system that is fully dedicated to the civil aviation community.

"Intelcan is proud to accept this project, bringing forth a full commitment to the values to which we adhere in bringing our international projects to conclusion, with full satisfaction of our customers," states Georges Ata, CEO of Intelcan. "This project constitutes a major milestone towards the improvement of safety related to air transport by providing the Air Traffic Controllers with modern, state of the art tools and equipment which will support CADSUR in its critical mission as an Air Navigation Services provider. Once the project is completed, the civil aviation of Suriname will move from procedural ATC to radar ATC."

ABOUT CADUSR

CADSUR is a unique aviation regulator in Suriname, responsible for the air traffic transport who has established a national air navigation services provider. CAD will ensure that the Surinamese air transport industry, in all its aspects, will continue to be developed in a safe and efficient manner in order to serve the country's needs.

The department which forms part of the Ministry of Transport, Communication and Tourism functions as a regulator of all aviation activities in Suriname and ensures that such activities are carried out in compliance with those international standards, which Suriname has adopted as a result of its membership in organizations such as International Civil Aviation Organization (ICAO).
