

Intelcan Increases Its Presence in Korea with MSSR Mode S and ATM Contract

Intelcan is increasing its presence in Korea with another contract award for the supply and installation of an MSSR Mode S and ATM system for the Gimhae International Airport.

The full solution will include Intelcan's SKYSURV MSSR, SKYCONTROL ATM, a complete VCCS system, consoles and relocation of existing equipment. This project will be implemented on an aggressive schedule, completing by the end of 2010.

"This program is a great example of Intelcan's core capabilities." states CEO, Georges Ata "and we are pleased to accept the challenge."
